

Module 4 Study Questions

[Re-submit Assignment](#)

Due No Due Date **Points** 0 **Submitting** a file upload

Complete this brief, ungraded assignment and save it in a .txt format. Save the file like so: **[your name], X436.2, Module 4 Study**. Then, submit upload your .txt document by clicking submit on the right hand side of your screen.

1. What will happen if you abuse the **CharStack** class by **pop()**ing more characters than you **push()**? Try it and see.
2. When should you use a package to contain a group of classes, and when should you use nested classes?
3. Why is it not advisable to make everything public?
4. Overloaded functions were introduced into the C++ language so that constructors could be overloaded. Can you think of some other uses for overloaded functions besides having multiple constructors in a class?
